PLANT STEM CELL TECHNOLOGY

STEM CELL EXTRACTION FROM AWARDING-WINNING MAJESTEM™ (EDELWEISS) AND SNOW ALGAE

This biotechnological procedure maintains and activates the skin's stem cells. Activated stem cells positively affect multiple areas, including genes, cells, matrix and tissue – areas closely linked to reducing signs of aging. They protect cell DNA, stimulate and improve natural cell renewal, strengthen skin structure, and make skin smooth for firmer and younger-looking skin.

REDUCES WRINKLES

ANTI-WRINKLE PEPTIDE COMPLEX ARGIRELINE®

ARIZE includes an Argireline® complex. Argireline® is a revolutionary anti-aging ingredient that fights fine lines and pronounced wrinkles. It invigorates the skin, leaving it firm and healthy. It also minimizes skin impurities and combats the formation of large pores. Argireline® is the only anti-wrinkle peptide with clinically proven effects.

MOISTURIZES

72H MOISTURE COMPLEX – PENTAVITIN (ECOCERT/NATRUE CERT)

This biotechnological moisture complex creates a moisture barrier on the skin after application and binds deep within the layers of skin, holding on tight for up to 72 hours.

HYALO-OLIGO COMPLEX (ECOCERT/ORGANIC CERTIFIED)

A low molecular weight, short-chain hyaluronic acid which penetrates deep into the skin and provides lasting moisture. The Hyalo-Oligo complex supports two times more moisture retention than conventional hyaluronic acid. It improves the structure of the skin's deeper, elastic layers, and actively supports skin regeneration.
