PLANT STEM CELL TECHNOLOGY

STEM CELL EXTRACTION FROM AWARDING-WINNING MAJESTEM™ (EDELWEISS) AND SNOW ALGAE

This biotechnological procedure maintains and activates the skin's stem cells. Activated stem cells positively affect multiple areas, including genes, cells, matrix and tissue – areas closely linked to reducing signs of aging. They protect cell DNA, stimulate and improve natural cell renewal, strengthen skin structure, and make skin smooth for firmer and younger-looking skin.

MOISTURIZES

72H MOISTURE COMPLEX – PENTAVITIN (ECOCERT/NATRUE CERT)

This biotechnological moisture complex creates a moisture barrier on the skin after application and binds deep within the layers of skin, holding on tight for up to 72 hours.

OTHER EFFECTS

- ✓ **ALOE VERA** moisturizes, calms and soothes itchiness or irritation. It has anti-aging and antimicrobial properties, and is anti-inflammatory. Eradicates skin blemishes, diminishes age lines, and helps to increase the production of collagen.

ALTERNATIVE PRESERVATIVES

To combat the formation of microorganisms, HANZZ+HEIDII uses nature-identical preservatives, which occur in nature in the same composition, but cannot be obtained in the required quantity or quality. They are therefore synthetically reproduced with the help of chemical reactions, and are approved according to the BDIH natural cosmetics standard conventional preservatives. These do not irritate or dry out the skin.
